## DETAILED ACTION

### *Allowable Subject Matter*

Claims 1-9 and 11 are allowed.

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for protecting a user's privacy within a data communications network. Independent claims 1-6 and 11 recite the uniquely distinct features of "receiving, by said user from said authority over said data communications network, a randomized identifier (ID) in response to said enrolling and using said randomized ID, by said user, and a service request to obtain services on said data communications network, from a service provider wherein said service provider is different from said authority". Independent claims 7-9 recite the uniquely distinct features of "receiving, over said data communications network, a Kerberos ticket in response to said user authentication data, said Kerberos ticket comprising a randomized user ID; and using said Kerberos ticket to obtain services from one or more service providers on said data communications network wherein said one or more service providers are different from said authority". The cited prior art, Scott et al (US 6,484,260) and Hawkes et al (US 20030039361), each disclose securing a communication within a network but each fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
